

There were approximately 926,200 abortions performed in the U.S. in 2014, the most recent year for which statistics are available from the Centers for Disease Control — an average of $926,200 / 365 = 2538$ abortions per day. The following pictures depict the developing human being at various stages through pregnancy and indicate how many developing humans after the stage depicted are killed on average every day in the U.S., based on statistics from the CDC.

Abortion percentages are calculated from the Center for Disease Control data: <https://www.cdc.gov/mmwr/volumes/66/ss/ss6624a1.htm> (Tables 7&9)

1 Day after Fertilization

2538 developing human beings are killed by abortion every day in the U.S. after the first day of development.

4 Weeks after Fertilization

(earliest point for which the CDC provides statistics)

1,592 developing human beings are killed by abortion every day in the U.S. after completing their 4th week of development.

6 Weeks after Fertilization

836 developing human beings are killed by abortion every day in the U.S. after completing their 6th week of development.

8 Weeks after Fertilization

484 developing human beings are killed by abortion every day in the U.S. after completing their 8th week of development.

10 Weeks after Fertilization

282 developing human beings are killed by abortion every day in the U.S. after completing their 10th week of development.

12 Weeks after Fertilization

130 developing human beings are killed by abortion every day in the U.S. after completing their 13th week of development.

14 Weeks after Fertilization

79 developing human beings are killed by abortion every day in the U.S. after completing their 15th week of development.

18 Weeks after Fertilization

32 developing human beings are killed by abortion every day in the U.S. after completing their 18th week of development.

Birth = (normally) 38th Week after Fertilization

There have been reports of babies being killed or allowed to die after being born at full term. It is certain that human beings that are born alive as a result of attempted late-term abortions are sometimes killed or allowed to die. No statistics have been found on this phenomenon.
